THE WEEK.

Recent gains in the volume of business are fully maintained, but further improvement is somewhat retarded by unfavorable weather in some sections. Buyers are still arriving at the leading cities, placing additional spring orders, and most fall lines that have been opened are meeting with an encouraging reception. Despite occasional requests for extensions, collections are more prompt on the whole. Manufacturing returns are all that could be desired, building operations expand as the season advances, and agricultural prospects are better than normal. There is little friction between capital and labor, most new wage scales being arranged on the old basis, and in some cases advances are granted, while the number of unemployed is steadily decreasing. Freight traffic is very heavy, some congestion occurring, and railway earnings in March were 9.2 per cent. larger than last year. Foreign commerce at this port is very heavy, exports for the last week exceeding the same week in 1904 by \$4,590,709, while imports increased \$1,975,296. Money is slightly easier, notwithstanding the Japanese loan, several large railway bond issues and a heavy withdrawal of Government deposits from the banks. Stocks rose to the highest point of the season, the larger transactions accounting for part of the 73.6 per cent. increase in bank exchanges at New York, as compared with the same week last year. At other leading cities the gain was 16.8 per cent.

A general increase of wages at the plants of the greatest iron and steel producer is another tangible evidence of the improvement in that industry. New orders are coming forward constantly, and it is probable that the tonnage of advance business on the books now surpasses all previous high-water marks, although there is some discussion regarding the low prices at which some of this business was accepted last fall. The most satisfactory feature at present is the steadiness of current quotations, indicating that there is little reason to fear excessive inflation of prices and the usual aftermath of depression. Some difference of opinion is expressed regarding the amount of pig iron that is wanted by the Steel Corporation in addition to the output of its own furnaces, but a considerable tonnage has been taken, and more will doubtless follow. It is generally conceded that

the final report of March blast furnace output will establish a new record. Some anxiety is expressed as to the ability of the railways to handle promptly the unprecedented ore movement that will begin on the Lake next week, but it is gratifying to note that a labor dispute is less imminent. Railway equipment of all kinds continues to find a ready market, and there is seasonable activity in structural steel, while machine shops in all parts of the country are working at full capacity.

Increased activity is noted in the hide market, tanners operating freely, and branded hides are in light supply. Improvement is also seen in leather, shoe shops at the East seeking material freely. Sales of hemlock sole have aggregated 250,000 sides. Union and oak sole and union backs are selling well to western manufacturers. Quotations of both hides and leather average somewhat higher. New England footwear factories are receiving a fair volume of fall contracts from western and southern jobbers, but duplicate spring orders are scarce, and many plants will soon shut down to take inventories prior to opening the cutting season. Jobbers and retailers are having a brisk Easter trade. Little that is new has developed in the textile industries, but former conditions are more marked, particularly as to the strong position of the manufacturer. The cotton situation is somewhat remarkable, because buyers make little effort to prepare for the future, although such scarcity exists in many lines that not only are premiums paid for prompt delivery, but poorer quality and short lengths are often accepted without questioning. More export business has appeared, and it is evident that domestic buyers of this class of goods will be compelled to resort to much substitution.

Crop prospects are still very favorable, several State estimates of winter wheat condition being particularly promising, but option quotations recovered part of their recent loss owing to a disposition to cover short accounts. The increased demand for new crop options is a natural result of limited supplies in all positions, and whenever prices become attractive there appears investment buying of this nature. Foreign crop news is satisfactory, and it is not probable that export business will revive until quotations decline still further. Corn also developed strength, especially for the May option. Western receipts of 1,960,104 bushels of wheat for the week compared with 2,315,896 last year, and exports from all ports of the United States were 859,278 bushels, flour included, against 1,490,638 a year ago and 3,415,523 two years ago. Arrivals of corn at primary markets were 3,844,584 bushels, against 1,988,599 in 1904, while Atlantic coast exports of 3,240,388 bushels compared with 854,277. Conflicting emotions are shown in cotton trading, resulting in little net change of quotations. Large stocks and more readiness to sell by southern holders are offset by a good foreign demand and predictions of a reduced yield.

Insolvency statistics for the first quarter of 1905 indicate a lower commercial mortality in almost every section of the country than in the same three months of the preceding year. The slight increase in number of failures is readily explained by the sudden fall in the price of cotton, as more than the net difference occurred in a few southern States. All commercial defaults numbered 3,443 and involved \$30,162,505, against 3,344 failures last year for \$48,066,721. The decrease in amount of defaulted indebtedness was distributed throughout practically every industrial department, as shown by the classified statement, and as to banking suspensions, there were only 22 against 32 last year, while the liabilities were \$2,727,307, against \$9,013,098. The average of defaulted indebtedness to each firm in business was only \$24.69, a gratifying decrease from the average of \$37.49 in 1904; while the ratio of unpaid debts to solvent payments through the clearing houses was only 85 cents per \$1,000, against \$1.89 a year ago. Each month of the three showed a satisfactory decrease in comparison with the liabilities in the corresponding month last year.

THREE MONTHS' INSOLVENCIES.

Commercial failures in the United States during the first quarter of 1905 were 3,443 in number and \$30,162,505 in amount of defaulted indebtedness, compared with 3,344 failures in the corresponding months last year, when the liabilities were \$48,066,721. In manufacturing occupations there were 776 suspensions involving \$11,946,691, against 729 failures for \$14,687,436 last year; trading defaults were 2.575 in number and \$16,336,736 in amount, compared with 2,458 last year for \$19,197,464; other commercial failures were 92 in number and \$1,879,078 in amount, against 157 in 1904 when \$14,181,821 was involved. In addition to these mercantile and manufacturing defaults there were 22 banking suspensions for \$2,727,307, comparing most favorably with the 32 failures involving \$9,013,098 in the same months last year. The trifling increase in total number of failures was more than offset by the large decrease in the amount of defaulted indebtedness. This improvement is found in every department, and the moderate increase in number is readily traced to the numerous small general stores and other lightly capitalized trading concerns at the South that were unable to withstand the losses produced by the sudden decline in price of cotton early in the year.

Careful analysis of these insolvency returns tends to strengthen the sentiment of confidence that has been gradually developing since the opening of the year. The small increase in number of failures at the South is not alarming nor difficult to understand, and latest reports indicate much improvement in that respect. There was no event during the opening months of 1905 calculated to produce a set back in business; on the contrary, everything has tended to improve the outlook. Part of the decreased liabilities, as compared with last year, were, of course, due to the Baltimore fire, especially as to the mortality of insurance companies, but carrying the comparison further back it is most gratifying to find that no year since 1881 made as good a showing as to the amount of defaulted indebtedness, except 1899, when conditions were phenomenally prosperous, and prices rising so rapidly that the situation contained the unhealthy element of inflation which developed into the subsequent reaction and readjustment. Current conditions are consequently even more wholesome than existed six years ago, because greater and more permanent prosperity should result, unless a similarly artificial situation is generated.

New England failures were slightly more numerous than last year, especially in manufacturing branches in Massachusetts, but the decrease in amount of liabilities was fully

one-half for the entire section, and much more for the Bay State. Other changes in this section were not significant, Rhode Island making the best exhibit, and while there were two banking failures in New England each year, the liabilities in 1905 were merely nominal, while over \$1,500,000 was involved last year. In every detail the three important Middle States made favorable comparisons with last year. While the decrease in number was only 22 for New York, there was a fall of over \$3,000,000 in the amount involved, or more than one-third. New Jersey also reported about twenty fewer suspensions, and liabilities were not one-half last year's. The improvement in Pennsylvania was less striking, but it was more or less evident in every commercial division. In only one respect did the Middle States fail to improve on last year's statement; that was in the banking column, where a few large suspensions occurred, and the losses in 1904 were practically nominal.

1905	.85				

At the South there was an increase of 125 failures, or about one-fifth as to number, but a very noticeable decrease occurred in liabilities. In fact, the amount involved was scarcely more than half as large as it was in the same quarter

of 1904. This apparent discrepancy is easily explained, however, for there is a decrease of almost \$4,000,000 in the third class, which embraces insurance companies. As there is a similar difference for the State of Maryland, it is not necessary to look beyond the Baltimore fire for a complete solution. As previously stated, the increase in number was among the small traders; notably in Georgia, Mississippi and Louisiana. Surprisingly little alteration appears in comparing the failure statistics of the three Southwestern States. In no case was the change in number significant, Arkansas showing a small increase while the other two exhibited slight improvement. Liabilities about doubled in Arkansas, while there was a decrease of a third in Texas, or almost \$500,000.

Numerically, there was an increase of about 10 per cent.

in the failures of the five large Central States, but the amount of defaulted indebtedness was about cut in half. Illinois provided the bulk of the improvement, liabilities for that State alone decreasing \$2,500,000, while Ohio contributed over a million dollars, and Michigan's losses decreased about 50 per cent. Indiana also showed somewhat smaller indebtedness, and Wisconsin alone in this section recorded an increase in the amount involved. While there was a fairly good gain in every commercial department, the most striking decrease in liabilities appeared in the banking failures, of which there were only two less, but the amount involved was smaller by \$4,300,000.

At the West there was a small contraction as to number, but the liabilities were somewhat larger on the whole. The most noticeable decrease in number occurred in Iowa, and

[NOTE.—Iron, Woolens and Cottons include all the branches of those manufactures; Machinery includes vehicles, shipbuilding, hardware, fixtures and impents; Lumber includes saw, planing, sash and door mills and furniture; Clothing includes furnishings; Chemicals include fertilizers and oils; Printing includes books and maps; Leather and Shoes include saddlery, trunks and rubber goods; Liquors include wines, brewers and bottlers; Glass includes pottery, lime, cement, quarry and stone; General Stores include department stores and instalments; Groceries include creamery, teas and coffees; Hottels include lodging houses and caterers; Dry Goods include curtains and draperies; Furniture includes glass and glassware; Hardware includes implements and utensits; and Jewelry includes watches and optical goods. Brokers include agents, commission men, real estate agents, insurance, storage, express, harbor lines, etc.]

the Indian Territory recorded only half as many failures as last year, while Colorado showed a noteworthy increase in number. Liabilities were much heavier in Minnesota and Nebraska, while Iowa showed the largest decrease. Banking losses were less than half as large as last year.

On the Pacific coast the number of insolvencies was exactly the same, but the amount involved was much smaller this year. Every State showed more or less decrease in liabilities, with the single exception of Oregon. California reported only about two-thirds the amount noted last year,

and Utah scarcely more than one-fourth. As to occupation, the increased loss on the Pacific occurred in manufacturing, while trading concerns showed the improvement.

Comparison of insolvencies during the first quarter of 1905 with those of the preceding year, according to occupation, is most instructive. Eight of the fourteen manufacturing classes recorded smaller liabilities, the most notable decrease occurring in glass and earthenware, products of iron and steel, including machinery, and liquors and tobacco. On the other hand, losses were much heavier in the class

embracing chemicals and drugs, and there was considerable increase in both branches of textile manufacture, as well as milling and printing. As to number of failures, exactly half of the manufacturing classes reported more than in Only four of the fourteen trading classes showed heavier liabilities than last year-general stores, groceries and meats, drugs and hardware-while in neither of these divisions was the alteration significant. Several of the classes where decreases were shown made very striking comparisons; thus, in hotels and restaurants this year's losses were about \$700,000 smaller, or less than half, both clothing and dry goods showed a contraction of half a million in amount of liabilities, and in miscellaneous trading the decrease was \$1,440,000. Nine of the fourteen trading classes recorded fewer defaults than last year, and one exactly the same, so that only four trading occupations, according to this classification, showed fewer insolvencies than during the same three months of 1904.

30					41	- 1	1

March failures were more numerous than last year, but the amount of money involved was very much smaller. The decrease was in every large group, but particularly the third division of brokerage and insurance concerns. As to the manufacturing branches, exactly half of the fourteen unfered heavier losses than last year, but in no case was the increase heavy. Only five of the fourteen trading classes showed smaller liabilities than last year, but the total was a little lower, while the only changes of importance were the largely increased losses this year in general stores, groceries and hardware, and the reduction of almost one-half in miscellaneous. Numerically, the increase was very large in general stores, groceries and liquors. Separating the large and small failures for March, eleven defaults in manufacturing provided almost exactly half the liabilities, leaving an average of only \$6,269 for the remaining 275 suspensions, which is the lowest average for the bankruptcies for less than \$100,000 each that has occurred in the corresponding month of any year since these records were first compiled, and in the trading class the average was \$5,726, against \$7,263 in March, 1904.

Failures in Canada.

Commercial failures in the Dominion of Canada during the first quarter of 1905 made a very satisfactory comparison with earlier years, although slightly exceeding the losses in 1904. Manufacturing insolvencies were 68 in number and \$1,089,157 in amount, against 65 for \$568,165 last year; trading suspensions numbered 285 and involved \$1,797,422, compared with 239 for \$2,040,686; and in other commercial lines, not properly embraced by the two principal classes, there were four failures with liabilities of \$9,300, against seven last year for \$95,767; a total of 357 commercial failures with a defaulted indebtedness of \$2,895,879, compared with 311 suspensions in 1904 and \$2,704,618 liabilities. In each year there was one banking failure; in 1905 involving \$335,000, against \$20,000 in 1904. This year's record would have made a much better comparison but for a very large shoe manufacturing suspension at Yarmouth, Nova Scotia, for about \$400,000. The large banking failure was located

for about \$400,000. The large banking failure was located at the same place.

Six of the fourteen manufacturing branches record smaller liabilities than last year, seven made less satisfactory exhibits. Aside from the large increase in the leather class, the noticeable rise was in milling. Numerically, there was very little alteration. Eight of the fourteen trading occupations made better exhibits than in 1904, particularly groceries and meats, and dry goods. In most respects, however, insolvency returns from the Dominion were very similar for the first quarter of the last two years, both of which compared unfavorably with 1903, but made most satisfactory comparisons with the two years preceding.

SOUTH AFRICAN TRADE RETURNS.

[From our regular Correspondent at Johannesburg.]

Even those who watched the trade decline in the Transvaal last year most closely must have felt some surprise at the large deficiency shown by the annual table of imports that is just published. Compared with 1903, the falling off amounted to nearly £6,000,000; to be precise it reached £5,823,671. Nor can the position of the Cape Colony be viewed with any greater complacency, the difference in the imports there for the two years showing a drop of over £12,000,000. In regard to exports there was an increase in the Transvaal of nearly £5,000,000, and in the Cape an advance of approximately £2,000,000. In dealing with the Cape figures, however, one important factor has to be borne in mind: Goods are both exported and imported from the Cape ports that either come from or are required by the inland colonies. Thus from the total volume of exports, valued at £27,406,672, has to be deducted the gold and diamonds shipped from Cape Town by the Transvaal mines. while a certain quantity of the goods imported-roughly £5,000,000 worth last year-simply passed through the Colony, yielding revenue in the shape of railway revenue. Making the necessary reductions, the actual position would approximately be: Imports, £17,000,000; exports, £12,-000,000; balance of imports, £5,000,000.

Examination of the table of imports for the Transvaal reveals the fact that practically every department of trade suffered severely. The value of foodstuffs fell from £3,300,000 to £2,740,000, and the decrease of £560,000 would have been much larger had it not been for a big advance in the sugar bill. Soft goods showed a difference of upwards of £1,000,000, the value only being £1,928,000, as against £3,080,000 in 1903. These figures include an item for wearing apparel, etc., which alone accounts for nearly half the falling off under this head. Woolen manufacture was down 50 per cent., and haberdashery and millinery close upon 33 per cent.

Coming to machinery, there was a decline in value of £700,000, namely from £1,946,612 to £1,247,982. Mining machinery, the most considerable item, sunk from £1,402,-681 to £718,832, or nearly one-half, while manufacturing machinery was comparatively worse, the figure being £54,-008, against £149,043. Hardware and iron and steel goods are valued at £1,146,000 as against £1,628,000, a difference of £482,000. Agricultural implements descended from £139,000 to £57,000, whilst wood (manufactured and unmanufactured) exhibits a difference of over £500,000, due in part no doubt to a fall in price. Other decreases which may be named are as follows: Leather, nearly £100,000; vehicles, £290,000; furniture and cabinetware, £380,000; boots and shoes, £160,000. The only considerable increase is in dynamite and other explosives, the import of which exceeded that of the previous year by £160,000.

Nothing could show more clearly the main industries of the Transvaal than the list of exports. Goods exported reached a value of £17,770,988, but of this sum gold accounted for £16,054,809, and diamonds for £901,745, leaving £814,434 for all other goods. In 1903 the gold export was put at £12,969,912, the diamond at £61,820, and the rest at £317,844. Outside the precious metal and stones, coal, wool and tobacco furnish the best figures. The actual increase during the year was £4,801,076, leaving a balance of imports over exports of £1,000,000.

The principal declines in imports at the Cape will be admirably seen from the following table:

Importations.	1903.	1904.
	£7,600,716	£4,403,740
Food, luxuries and drink	7,607,111	5,403,273
Animal and vegetable substances	870,976	664,928
Minerals	660,404	447,322
Building materials	3,884,357	2,379.570
Animals living	626,354	246,305
Miscellaneous	5,050,030	3,2:7,870
Specie	923,189	39,031

The chief items of export, where improvement is visible, were ostrich feathers, grease wool, fish, hides, horses and aloes.

WEEKLY TRADE REPORTS.

Boston .- Retail traffic in dry goods and clothing is somewhat irregular, but most reports are favorable, and with settled weather a large volume of business is expected. Popular lines of spring and summer goods are moving freely out of dry goods jobbers' hands, and the season as a whole promises to be one of the best on record. March sales of some houses in certain departments exceeded all records. Cottons at first hands are selling more freely to the home trade, especially fine yarn goods. Linens are in good demand. Men's wear woolens and worsteds are in good position, with many mills sold far ahead. Spruce lumber operations are retarded by the small supplies offering for prompt delivery, the demand for which is urgent, with strong prices ruling. Southern lumber is firm, with a good yard business and several large contracts recently closed for hard pine. Western lumber and hard woods are in good demand. Building materials are quite active, with a steadily increasing call for cement and lime. Paint and painters' supplies are feeling the effects of renewed building activity. There is a fair movement of chemicals. Dyes and tanning materials show improvement. Tobacco is firm and leaf in good demand Business in wines and liquors is fair. Dairy products continue firm, with light offerings of butter and cheese. Flour is still dull on large lines for future delivery, but there is a fair movement in small lots. The trading in coarse grains is very dull, but is expected to improve with the opening of lake navigation.

Portland, Me.—Retail trade is fair. Traveling for the spring months has been a little better than the average, and business will show improvement later. In dry goods advance orders have been in fair volume. Hardware dealers report business rather dull, but it has improved somewhat this month. Jobbing grocery houses are only fairly busy, but shoe jobbers report conditions favorable. Shoe factories are running steadily, and paper and pulp mills are doing a large volume of trade. An increased local demand for money is reported among the banks, deposits are well kept up, and collections fair.

Albany.—Lumber dealers report more active inquiry. Prices of spruce and several grades of pine have advanced. Spring trade in groceries opens well. Shoe jobbers report sales in excess of last year. Stove manufacturers report orders for fall delivery coming in satisfactorily. Collections here are only fair; money not in great demand.

Troy.—Manufacturers of knit goods are much encouraged with orders received for fall and winter delivery, and manufacturers of linen shirts, collars and cuffs have liberal orders, and all factories are working full time. Building permits issued indicate much trade in that direction. Jobbers in staple lines report sales about the same as last year, though collections somewhat better. Retail trade in all line is good.

Gloversville.—Glove manufacturers continues busy, although a shortage of leather stock has handicapped them to some extent. Indications are that spring trade will not be fully supplied. Retail business is fair, and collections good.

Philadelphia.—Manufacturers of textiles are slowly increasing their output, with the exception of manufacturers of upholstery goods and trimmings, in which there is considerable idle machinery. Manufacturers of dress goods, hosiery and carpets are doing a fair business. In the building line a number of permits have been taken out, and several large operations will soon be started. Brick manufacturers report a slight increase in business, and prices are fairly good. Cement manufacturers are having a good business. Manufacturers and wholesale dealers in paper note a steady improvement in trade, sales thus far being ahead of last year. Prices are firm and collections satisfactory. Wholesale dealers in millinery goods report a steady increase in the demand as weather conditions improve. Collections are fair. Manufacturing and wholesale jewelers

state sales are ahead of last year at the same period, but collections are not satisfactory.

Business the current week in drugs and chemicals is satisfactory. Buyers are conservative and inclined to order in small amounts, but frequently. Collections have somewhat improved. Manufacturers and dealers in colors and paints are having a large volume of trade. Wallpaper manufacturers and dealers are doing a fair business, but considerable competition exists and the margin of profits is very close. The electrical trade report a good volume of business, with prices fairly well maintained. Machine shops are well employed, and large consumers of iron and steel continue busy. Some of the large fancy grocers are having a good trade. In wholesale and commission lines business is somewhat quiet, with collections slow. Sugars, syrups and molasses are inactive, and teas and coffees are only in moderate jobbing request.

Pittsburg .- The increase in wages granted to many of the employés of the largest steel producer will benefit the retail merchandise line. The increase partially restores the reduction made in 1903. Activity in merchandise lines depends to a great extent on the steady operations of the steel mills. Leases on business places, residences and tenements are generally at a higher rate than last year and high rents and living costs are deterrent factors. Dry goods are active and buyers are broadening in their demands. Mail and road orders are better and jobbers are pleased with the outlook. Hardware is improving and orders from farming communities are large. The local demand is good and with increased building operations prospects for builders' hardware are bright. Lumber is finding a larger market and prices are firm as follows: White pine \$85 to \$90, yellow pine \$24; hemlock \$16.50 to \$18.50 and shingles \$3.10 to \$3.25. The demand for window glass has not improved during the week. The factories are running steadily and stock is being accumulated. Prices are generally quoted at 90, 10 and 5, but lower prices are reported and the market is weaker. Imports of window glass for eight months ending February, 1905, amounted to 218,586 boxes, compared with 549,436 boxes during the same period in 1904. The decrease is due to the strike of glass workers in Belgium.

Baltimore.—Business with wholesalers is seasonably active, though not up to last year's, when conditions were exceptional. Clothing manufacturers are employed in getting out their fall samples; the season just closed has been quite successful, though the unusual number of cancellations caused the volume of shipments to fall considerably short of the amount of orders booked. The dry goods market is busy, buyers from nearby districts coming in for spring stocks; collections are generally good, and the outlook in the South is better, though farmers and merchants in the country districts are still holding cotton for better prices. Jobbing trade in hats and caps is quite good and prices are strong, owing to the increased cost of raw material; collections are somewhat disappointing and the prospect only fair. There is no marked change in boots and shoes, the volume of trading being normal, but there is slight improvement in collections Business with dealers in drugs and chemicals is generally quiet, retailers are buying from hand to mouth, and collections are poor. The furniture factories are moderately employed, though bad weather is having an adverse effect upon retail trade and collections are disappointing. The market for leaf tobacco is quiet, with values firm and collections fair; manufactured tobacco is in brisk demand, but prices are unsettled. Harness manufacturers report the volume of business in their lines decidedly better than last year, and prices are higher, owing to the rise in raw materials. Wholesale business in fertilizers is more active, factories receiving good orders for immediate shipment, and there is a better call for material, with values unchanged.

Nashville.—Trade in all lines has improved, and while not up to the same volume as last year, still it is fairly satis-

factory, and a better feeling prevails. Collections have been slow for several weeks.

New Orleans.—The movement of merchandise in all lines has steadily increased and leading houses report that sales are equal to what they were a year ago, and in some lines, especially in groceries and provisons, larger. Weather conditions are favorable and orders are now coming in quite freely. Retail trade has been fairly good.

Chicago.—Trade exhibits steady progress in the leading departments, weather conditions being favorable to all outdoor work, and preparations indicate an early resumption of lake traffic. Iron and steel production maintains a heavy aggregate and new bookings have held up well for deferred delivery, particularly in pig iron, plates and structural shapes. The foundry and machinery branches have increased their output and further activity is seen in farm implements, hardware, plumbing and electrical manufactures. Lumber of all kinds has been in strong demand for both building and factory use, and continued scarcity of hard woods has given much firmness to values. Receipts of lumber were 26,758,000 feet, against 35,232,000 feet last week, and 25,207,000 feet a year ago. The planing mills have all the work that can be attended to for months ahead, and furniture makers are running steadily. Construction work shows further headway, and there is considerable activity in the erection of office and business structures and dwellings, involving outlays in excess of recent previous years. This has caused a widespread demand for building material and dealers report good prices ruling for prompt shipment of stone, brick, cement and hardware.

Railroad traffic shows no diminution in the movement of heavy materials and general merchandise. Forwarding has been more prompt and less complaint is heard as to shortage of cars and motive power. Farm work is proceeding in all directions and this tends to narrower marketing of agricultural products. The markets for grain and provisions were fairly active, and packing has been heavy, the latest monthly statement showing a gain in hog products in store. Retail trade shows increasing volume and Easter specialties are in good demand. The good weather brought many visiting buyers into the jobbing market and large orders were placed for dry goods, c'othing, footwear and food products, transactions in some of the staples exceeding the volume of a year ago. Shipping rooms are worked day and night, more of the recent purchases requiring earlier forwarding than was expected. Retailers buy more largely on a discount basis and mercantile collections for both city and interior are satisfactory. New building permits this week aggregated \$804,300, against \$889,900 last week, and \$323,250 a year ago. Real estate sales were \$3,142,492, against \$2,363,110 last week, and \$1,888,549 a year ago.

Louisville.—Business in stoves and tinware is improving, but transactions are not equal to those of last year, either in volume or importance. The drug trade is active and orders are of good size. Sales of hardware are now about 10 per cent. over those of last year, but there were considerable losses in January and February. The demand for agricultural implements of all kinds and farm supplies is especially noticeable. Dealers in yellow pine are unable to make shipments fast enough to meet contracts. House sales and mail orders for clothing have been light

Cincinnati.—Retail trade continues to improve. Whole-sale paper dealers report an increasing trade. Hardware trade is good, especially in builders' lines. Business in paints and painters' supplies continues good. The whole-sale dry goods trade is active and in many cases buyers have purchased largely for future deliveries. The provision market has been steady, though the general movement has been only moderate. The wholesale grocery market has remained steady and quiet, but closed with a fair demand. Business continues good in clothing and collections are unusually good. There is an active demand for build and material, and building permits issued this year are fai in

excess of last year. The money market has been a little dull, but firm, and the demand for securities is poor.

Cleveland.—Seasonable weather has been favorable to the development of retail spring trade. Manufacturers and jobbers of clothing and kindred lines are busy, and the volume of business exceeds that of last year. The real estate market continues active, money is easy and collections are satisfactory.

Columbus, O.—In most lines of jobbing and manufacturing business is satisfactory. March weather was favorable to early spring business and sales show a good gain over last year. Considerable complaint is heard regarding collections in many leading lines of trade. The coal trade is still unsatisfactory, but there is hope that the opening of lake navigation will make it better. The building season has opened early and indications are that this season will exceed any former one.

Detroit.—In jobbing and manufacturing trade is seasonable, a number of lines reporting an increase of 5 to 10 per cent. Col'ections are improving, and the outlook is favorable. Banks report a good demand for loans, rates for paper being 5½ to 6 per cent. Building permits for past three months are double in amount of those last year.

Grand Rapids.—Trade in dry goods, millinery, boots and shoes and house furnishings has improved. Lumber is active and in fair demand. There were 155 building permits issued in March for \$161,059, against 81 for \$83,770 a year ago. The produce market is dull, but southern fruits are selling freely.

Minneapolis.—Favorable weather conditions have been of assistance to spring trade, and shipments of merchandise are steadily increasing, though orders are still small and cover pressing needs only. The tendency is to curtail stocks as much as possible until the present wheat crop is assured. Collections are fairly good. Shipments of white pine for the week were 8,016,000 feet, against 7,840,000 feet a year ago.

St. Paul.—Trade conditions continue satisfactory. Spring goods are seasonably active and new fall lines are being well received. Dry goods jobbers report a substantial increase in sales over last year. Duplicate orders for millinery are plentiful and the demand for hats, caps, furnishings and footwear is well maintained. In groceries and provisions, jobbers report a seasonable activity. Jewelry and notions are in fair request. The wholesale trade in drugs and chemicals is very fair. Harness manufacturers report a brisk business and factories are busily employed. The demand for shelf and heavy hardware is good, and building and plumbers' supplies are active. Collections are fair.

St. Louis.—Traveling salesmen in leading lines are sending in large orders, while mail orders for immediate delivery are quite numerous. The attendance of personal buyers is fair, and they are making extensive purchases. Southern buyers operate rather freely. Collections are good. The demand for building materials is very large and increasing. Quarries and brick making establishments are taxed to their utmost capacities. Planing mills and sash and door factories are very busy. In March 1,030 building permits were issued for buildings to cost \$3,012,416, against 580 permits for \$1,617,809 last year. The latter included temporary buildings for \$399,850. Real estate transfers in March numbered 1,410 for \$7,825,490, against 889 transfers for \$4,218,258 in March, 1904.

Kansas City.—Wholesale business in dry goods and footwear has been active the past week, and in volume shows a good gain over last year. Trade is good in groceries, hardware, drugs, notions and millinery. Manufacturers generally are busy. There is a heavy demand for lumber and building materials. Collections are good. Retail business is fair. Money is in good supply and easy, but the demand is light.

Little Rock.—Jobbing trade in all lines shows a material inc ease, owing to more favorable weather. Collections are fair. Retail trade continues to improve as spring advances.

San Francisco. The rainfall for March has been unusually heavy, and the outlook for good crops is the best in years. Berries are coming in, and cherries will be on the market in two weeks. There is some fear of frost damage, which the winds have so far prevented. Feed is abundant, and dairy products are selling at low figures. If present expectations are realized, the grain crop will be the largest in years. Four ships have just been chartered to arrive for new grain crop loading the first of the season. Rates are 22 shillings 6 pence for wheat and 23 shillings 9 pence for barley, less 1 shilling 3 pence to a direct port. There are only seventeen free deep water ships in port, representing 32,100 tons of registered tonnage. At this time last year there were 80,000 tons of free tonnage in port. There are over 140,000 tons of tonnage on the way here or entered out against 125,000 tons a year ago. Vessels continue to leave in ballast for Australia and South America, as there will be no business for grain ships here until July. Three vessels have arrived with 534,600 codfish, and four more have just sailed for the fishing grounds. The fleet this year will be larger than usual. There is to be no sperm whaling this season. Most of the whalers wintering here have departed for the north, and the remainder will soon follow. value of exports for the month of March is \$6,875,200. This is the largest total in several months, and is nearly 90 per cent. greater than for the same month last year. The chief factor is the Oriental trade, which represents \$4,961,838 of the total, or over 70 per cent. In addition to the three regular liners in March, there were five extra steamers, with barley, cotton, machinery, iron, lead and other freight. Other extra steamers are to follow in April. In the first quarter this year exports show a value of \$14,557,000, against \$10,134,000 last year, a gain of \$4,-423,000. Shipments to the Orient for the quarter were \$8,620,672, against \$2,599,266 last year.

Trade Conditions in Canada.

Montreal.-Though the opening of navigation is still a fortnight distant, spring freight rates have gone into effect on all railways, and the movement of merchandise is much better. In dry goods also there is rather more business, mail orders being reported in fair number. Owing to favorable weather, shoppers are out in increased numbers. The woolen manufacturing industry continues in a very depressed condition, and dealers in raw wool report a very slack The cheese market is still dull, and quotations for new fodder cheese have not yet been fixed. The feature as regards values is the phenomenal advance in turpentine of 10 cents a gallon, credited largely to speculative manipulation. Owing to the advance in the New York sugar market, a local refinery advanced quotations 5 cents a cental a few days ago. The great March raw fur sales have been in progress in London the past ten days, and though telegraphic reports conflict in some details, a marked advance over prices of a year ago is shown in many lines of American furs, including mink, marten, otter, fisher and lynx.

Toronto.—Wholesale trade is fairly active. Business is good in dry goods. Travelers are out with fall samples, and sorting up orders have been numerous, and trade is in a healthy condition. In groceries there is an improvement, with teas and coffees in fair demand.

Quebec.—Business is up to the average. Collections are a little slow, but failures have been few and unimportant. The shoe trade continues dull, though some of the leading manufacturers are quite busy. At the opening of navigation numerous orders placed for spring delivery will be forwarded by water transit.

Halifax.—Trade conditions continue to improve and orders are now coming in freely. Renewals are frequent, the result of the long and stormy winter, necessitating the tyeing up of ready cash and the slow movement of freight.

BANK EXCHANGES.

Bank clearings continue heavy, and the total for March is, with one exception, the highest ever reported for any single month. Total exchanges this week at all leading cities in the United States are \$2,799,337,809, a gain of 52.6 per cent. over last year and 38.2 per cent. compared with the corresponding week of 1902. The increase continues largely at New York, where stock market operations swell bank exchanges considerably, but there is a good gain at nearly every other city compared with all preceding years, and the average daily figures for the past four months show record totals for the entire period. Figures for the week and average daily bank exchanges for the year to date are compared below for three years:

	Week,	Week,	Per	Week,	Per
	Apr. 6, 1905.	Apr. 7. 1914.	Cent.	Apr. 9, 1903.	Cent.
Boston	\$163,593,079	\$134.908,940	+21.3	\$133,936,854	+22.1
Philadelphia	135,809,535	113,264,153	+199	112,534,645	+20.7

January	437,861,000	344,432,000	+27.1	394,639,000	+11.0

THE MONEY MARKET.

The recent upward tendency of the money market appeared to have passed its zenith, and the tone became a little weaker with the quarterly disbursements and the receipt of subscriptions to Japanese and railway loans. These operations tend to stiffen rates at some interior points and also affect domestic rates of exchange. Spring transfers to the interior are being accomplished by payments to the Sub-Treasury rather than direct shipments. Borrowing by the railroads is for tunnel building and other improvements, so that this money will not be appreciably missed from circulation. There is still much uncertainty as to the disposal of the Japanese subscriptions, but for the present at least the market will not suffer. Foreign conditions are unchanged, large sums being available whenever the local rates rise to an attractive position, and much money has been accumu lated at leading European centers for war account that might easily be diverted hither. Continued ease is anticipated at London by prominent financial interests. Owing to Treasury withdrawals, there was a small decrease in the amount of money in circulation during March, but the loss in gold certificates was about neutralized by the increase in bank notes, indicating that immediate use was thus found for the liberated bonds. Last week's bank statement was a strong one, owing to the loan contraction. Future monetary conditions are complicated by the announcement that Government withdrawals from the banks will amount to \$27,000,000 by July 1. As an offset, there will be heavy disbursements on recent appropriations.

Call money has ranged from $2\frac{1}{2}$ to 4 per cent, the bulk of the borrowing being done at 3 to $3\frac{1}{2}$ per cent. Supply exceeds demand, and the tone is slightly weaker. Offerings of time money are heavier, and all periods up to six months are quoted at about $3\frac{1}{2}$ per cent. Commercial paper is not abundant, good names costing $3\frac{5}{4}$ to $4\frac{1}{4}$ per cent., and less well known endorsements being quoted 5 per cent.

FOREIGN EXCHANGE.

Trifling fluctuations are reported in continental exchange, and some improvement is noted in the demand for sterling remittance. Arbitrage business has continued to be an

important factor in the exchange market. A steady but small volume of commercial bills come into sight. The chief element of strength was the demand against heavy sales of securities by London, and the ultimate disposal of the Japanese loan will probably prove an important exchange influence. Quotations each day were as follows:

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
Sterling, 60 days	4.84	4.84	4.841	4.843	4.84	4.84

DOMESTIC EXCHANGE.

Rates on New York are as follows: Chicago, par; Boston, par; New Orleans, commercial 75 cents discount, bank \$1 premium; Savannah, buying at 50 cents discount, selling at 75 premium; Cincinnati, 10 cents premium; San Francisco. sight 7½ cents, telegraphic 10 cents; Charleston, buying at par, selling at \$1.10 premium; St. Louis, 10 cents discount bid, 5 cents discount asked; Minneapolis, 80 cents premium.

SILVER BULLION

British exports of silver bullion to the East from the opening of the year to March 23 were valued at £1,950,457, according to Messrs. Pixley & Abell, against £3,367,942 last year. India received £1,956,287, against £3,238,839 in 1904; China £1,370, compared with £71,000, and the Straits £2,800, against £58,103. Fluctuations in the London market have followed the demand from India and responded somewhat to the money market, although rates are not varying to any extent in either case. Daily prices follow:

Sat. Mon. Tue. Wed. Thur. Fri. London Prices 25.75d. 25.87d. 25.87d. 25.87d. 25.87d. 25.44d. 25.44d. New York Prices . . 55.75c. 56.00c. 56.00c. 55.87c. 55.00c. 55.12c.

MONEY IN CIRCULATION.

A slight decrease occurred during March in the total amount of money in the hands of the people, due to the Treasury withdrawals. The aggregate on April 1 was \$2,558,992,983, against \$2,560,614,712 a month previous, the per capita amount falling to \$30.86 for each man, woman and child. The principal decrease was about \$10,000,000 in gold certificates, offset by an equivalent gain in bank note circulation. Other changes were all small. Including Treasury holdings, the total stock of money in the country is \$2,842,907,406, compared with \$2,828,937,327 on March 1.

FOREIGN FINANCES.

Although holdings of gold coin and bullion in the Bank of England declined £1,009,245, the net result for the week was a stronger statement, because there was a loan contraction of £4,841,000, which made the proportion of reserve to liability 51.95 per cent., against 49.59 per cent. last week. The Bank of France made a poorer exhibit, gold holdings rising 2,725,000 francs, while loans increased 45,050,000 francs on account of settlements. American securities have provided a good share of the London activity, railway issues being purchased for continental account after a large amount of liquidation early in the week. The proposed Union Pacific borrowing attracted much attention abroad, as that security is a prominent feature in the dealings. Call money at London is easier at 11 to 2 per cent., with three months' accommodation costing 2 per cent. At Paris the open market rate is 2 per cent., and at Berlin 14 per cent. prevails.

The latest statement of gold and silver coin and bullion on hand in excess of certificates outstanding, and exclusive of the \$150,000,000 redemption fund, compares as follows:

	April 6, 1905	Mar. 30, 1905.	April 7, 1904.
Gold owned	\$71,646,034	\$69.391,940	\$99,497,383
Silver owned	24,762,907	25,231,036	17,353,179

Net gold holdings continue to expand as bank deposits are returned to the Treasury, and gross gold on hand has risen to \$694,359.443. The available cash balance is little altered at \$142.069,653, of which the national banks hold only \$89,547,795, in addition to disbursing officers' balances of \$8,352,648. On regular Treasury operations for the first week of April expenditures exceeded receipts by \$743,131, making the deficit for the fiscal year \$25,221,270.

NEW YORK BANK AVERAGES.

A decidedly better showing was made by the associated banks last Saturday, the surplus reserve rising to about one-third of what it was at this date last year. The improvement was again entirely due to the contraction of loans, in which transfer of accounts to foreign capital was the prominent factor. Specie holdings continued to decrease, while there was a large expansion of bank note circulation. United States deposits are now \$16,903,200. The statement in detail compares with earlier dates as follows:

beatening in dota	ii compares i	with carrier dates	ab lullo wb.

Non-member banks that clear through the New York Clearing House report loans \$111,721,300, an expansion of \$1,250,500; deposits \$123,271,300, a gain of \$743,200; deficit below 25 per cent. reserve \$1,502,825, a loss of \$749,400.

SPECIE MOVEMENT.

At this port last week: Silver imports \$48,111, exports \$527,200; gold imports \$779,551, exports \$728,199. Since January 1st: Silver imports \$666,337, exports \$9,433,964; gold imports \$3,975,211, exports \$31,935,847.

MONEY CONDITIONS ELSEWHERE.

BOSTON.—There is an easy tone to the market and lower rates are expected shortly. Call loans are quoted at 3 to $3\frac{1}{2}$ per cent; time loans at $3\frac{1}{2}$ to $4\frac{1}{2}$ per cent; commercial paper at 4 to $4\frac{1}{2}$ per cent; clearing house rate at $2\frac{1}{2}$ per cent; and New York funds at par for cash. Bank statement: Loans, \$196,258,000; circulation, \$7,780,000; deposits, \$152,417,000; due banks, \$73,052,000; United States deposits, \$2,808,000; with reserve agents, \$30,855,000; exchanges, \$14,268,000; due from banks, \$19,427,000; five per cent fund, \$383,500; legal tenders, \$5,770,000; specie, \$18,969,000; surplus reserve, \$1,969,714; New York excess, \$8,085,714.

PHILADELPHIA.—The money market is quiet and firm, and call loans are quoted at about 3 per cent., with time loans at 3½ to 6 per cent. The last statement of the Philadelphia national banks shows: Loans and discounts \$220,026,000, increase \$211,000; lawful money reserve \$59,569,000, decrease \$3,980,000; due from banks \$32,615,000, decrease \$55,000; due to banks \$102,532,000, decrease \$3,153,000; deposits \$150,485,000, decrease \$610,000; circulation \$12,188,000, increase \$179,000; percentage of reserve 27.0.

CHICAGO.—The demand for money is more diversified and rates maintain the firmness recently noted. Funds for the interior were in better request, and commercial requirements hold steady. Mercantile discounts are 4½ per cent. for choice names and a fair business was done in collateral loans at 3½ to 4 per cent. Sales of local securities largely exceeded those of a year ago, and the ten active stocks show an average gain this week of 30 cents per share, the improvement appearing in the industrial issues.

ST LOUIS.—The demand for money is improving, but is still of moderate proportions. Rates range at 4 to 4½ per cent. for call, and 4½ to 5 for time loans.

FAILURES AND DEFAULTS

Commercial failures this week in the United States number 232, against 244 last week, 255 the preceding week and 235 the corresponding week last year. Failures in Canada this week are 28, against 33 the preceding week and 29 the corresponding week last year. Below are given failures reported this week, the two preceding weeks, and for the corresponding week last year, with the total for each section and the number where the liabilities are \$5,000 or more:

THE GRAIN MARKETS.

A better tone has prevailed in the wheat market, and prices generally are higher than a week ago, the improvement being more pronounced in the speculative than in the cash values. The May delivery has shown the greatest advance, under the influence of general covering by shorts, who have become anxious over the security of their position. The deferred months have also advanced, but to less extent, the underlying cause for the gains being based more on sentiment than on any unfavorable change in the tenor of crop reports. While killing frosts were reported in Kansas and eastern Iowa early in the week, little attention was paid to them, as they were offset by very favorable State crop reports issued at the same time. The condition of winter wheat in Missouri was given as 91 per cent., against 73 per cent. by the State last December, and 77 per cent. by the Government. The condition of wheat in Kentucky was placed at 90 per cent., which compares with 85 per cent. last month and 59 per cent. last year, although on July 1st it had improved to 79 per cent. The condition of the crop in Ohio was estimated at 84 per cent., compared with 71 per cent. last month and 67 per cent. a year ago. Of the above three State-, Ohio shows an improvement of 13 points and Kentucky of 5 points from a month ago, while Missouri improved 18 points from last December. The wheat crop had an excellent winter, and it is unusual to have such an absence of damage from winter killing. From these State conditions an increased crop of 40 per cent. over last year, or 21,000,000 bushels, in the three States is indicated, and it is an interesting fact that the big crops of previous years have followed a high April condition. Much interest, therefore, attaches to B. S. Snow's estimate of the April condition of 90 per cent., and a high condition is expected in the Government report on April 10th.

Deferred deliveries are now under Liverpool for corresponding months, and it is reported that a large business has been done in new crop winter wheat in the Southwest for July-August-September shipment via the Gulf. There is little doubt but that the new crop will be in great demand from domestic consumers, owing to depleted stocks of millers throughout the country. The Northwest is expected to be an cager purchaser of new crop supplies. Stocks there of good wheat are very small, notwithstanding that millers are supposed to own most of the 3,000,000 bushels of contract wheat in Minneapolis. Their need of good wheat is indicated by the reported purchase by the Pillsbury people this week of 250,000 bushels No. 1 northern, in store

Offerings of wheat in the Southwest are increasing somewhat, as farmers are now cleaning their bins of wheat held in reserve pending the present crop's progress. This will likely lead to somewhat larger receipts and may result in the visible supply showing an even smaller decrease next Monday than the 491,000 bushels decrease last Monday, which compared with a decrease of 1,125,000 bushels the week previous. Other statistics have been rather bullish, the world's shipments being 400,000 bushels under the previous week, the amount on passage showing a large decrease of 1,544,000 bushels, while the world's visible supply showed a decrease of 1,569,000 bushels, compared with a decrease a year ago of 396,000 bushels. Foreign news continues favorable, though in France and the United Kingdom the weather has been rather too wet while in Spain droughty conditions prevail and a famine is threatened in some portions of the South. Shippers estimate the exportable wheat surplus of India at 48,000,000 bushels, which compares with 64,000,000 bushels shipped the past nine months, against 36,000,000 bushels the corresponding period the previous year.

MARKET FOR CORN.

A reaction has occurred in the declining tendency of this grain and prices have partly recovered the recent loss. A good speculative demand has been largely responsible for this, induced in turn by a good distributive demand in the

LATEST GRAIN STATISTICS.

Grain Movement each day is given in the following table, with the week's total, and similar figures for 1904. The total for the last two weeks is also given, with comparative figures for last year The re elpts of wheat at western cities since July 1, both years, are appended, with latest figures of exports:

The total western receipts of wheat for the crop year thus far amount to 182,286,364 bushels, against 202,594,755 bushels during the previous year. Atlantic exports of wheat, including flour, this week were 721,587 bushels, against 517,709 last week and 975,141 a year ago. Pacific exports were 32,541 bushels, against 118 373 last week and 433,998 last year. Other exports were 105,150 against 79,914 last week and 81,499 a year ago. Total exports since July 1 of wheat, flour included. were 34,162,272 bushels, compared with 107,468,754 bushels last year. Official statistics of exports are used up to March 1.

West, large clearances and a moderately decreasing movement, as indicated by a decrease in the visible of 867,000 bushels, compared with decreases the previous week of 108,000 bushels and a year ago of 371,000 bushels. Receipts would probably show a greater tendency to fall off were it not that interior shipments on the low freight rates have been figuring in arrivals. The cash demand is still rather slow, but with the opening of lake navigation, which is expected to be about April 10, it is believed the Chicago market will be relieved by shipment of a considerable amount of the corn now held there. This will tend to improve the cash situation. New export trade has been disappointing, as the advance in prices has restricted business, but should the market again decline to an export level it is likely that large sales will result, as America is the only country having corn available for immediate shipment. New crop Argentine corn will not reach Europe for one or two months, while the shipments from Russia and the Danube are practically nil; in fact, owing to the failure of the crop there last year, the latter country is now importing corn from America for the first time on record. Other countries bordering on the Mediterranean Sea, whose wants are usually supplied by exports from the Black Sea, are now using considerable corn from this country, the shipments last week amounting

MARKET FOR OATS.

The increase in the visible supply last Monday of 203,000 bushels was a disappointment to the trade in view of a decreased interior movement the preceding week of 600,000 bushels. Nevertheless the market has displayed considerable steadiness, although the advance in corn is doubtless largely responsible for this. The cash situation continues slow, and as the visible supply is two-thirds larger than last year and over double the quantity of two years ago, no great appreciation in prices is looked for while stocks continue to increase, especially in view of the very favorable crop outlook. Owing to the fine weather, the crop is being seeded very early and, unless something happens to mar present prospects, new oats will be available in the extreme Southwest by the middle of next month. The Missouri crop report gave the condition of oats as excellent and estimated an increase in the acreage of 3 per cent. This indicates that farmers are satisfied with ruling prices, notwithstanding that cats have been the lowest priced grain on the list all the winter.

LOCAL FLOUR MARKET.

Trade continues extremely slow and business is even duller than a week ago. The continued excellent crop prospects make buyers very bearish and unwilling to take hold at present prices, except when forced to. They also display great reluctance in taking flour due them on old contracts, as it represents a loss of 15c. to 40c. a barrel compared with what the same flour could be bought for at the present time. Purchases are mainly for immediate wants only, as a lower level of prices is expected in consequence of the outlook for a large wheat crop. Local stocks on April 1st were estimated at 114,800 packages, against 128,700 packages March 1st, and 99,200 packages a year ago. The decrease of 13,900 packages during March compares with a decrease of 41,500 packages during February, the smaller decrease last month being to a great extent due to large bakers having ordered from the docks and railroad terminals their own flour which was delayed in delivery, owing to the difficulty in obtaining lighterage and of carting it during the long period of congestion in the streets. Being in consumers' hands this flour does not appear in the estimated stocks.

MEATS AND DAIRY PRODUCTS

According to the N. K. Fairbank statement, the world's stock of lard on April 1, was 322,518 tierces, against 332,450 tierces a month previous, and 250,688 a year ago. The small loss for the month of March was in European holdings, as the amount afloat and Chicago stocks increased. Very little of interest has developed in the western markets for live stock and cured meats. Speculation in options follows the grain variations more or less irregularly, and a better cash demand helped to strengthen lard. Eggs are maintained fairly steady by a good demand, despite liberal receipts. Best grades of butter are also sustained by ready absorption of arrivals.

THE CHICAGO MARKET.

CHICAGO .- Advices as to growing crops continued very satisfactory and spring seeding promises to cover a larger acreage in some sections. Receipts this week aggregated 4,294,173 bushels, against 6,155,941 bushels last week and 2,367,226 bushels a year ago. Shipments 3,565,944 bushels, comparing with 3,417,958 bushels last week and 2,013,417 bushels a year ago, mainly corn and oats. The markets have been rather quiet for breadstuffs, flour being intensely dull. On Wednesday a sudden movement carried grain futures upward rapidly, the May wheat option being the leader under evident manipulation. The supply of contract wheat has increased here and the buying remains rather narrow, yet No. 2 red winter wheat recovered to \$1.16 per bushel, against \$1.121 last week. The coarse grains were freely offered and values made little change. Eastbound shipments of grain were again larger than a year ago, but flour was only 139,766 barrels, against 211,789 barrels. Stocks of grain in all positions increased 46,000 bushels corn, and decreased 140,000 bushels wheat and 210,000 bushels oats.

Provisions were dealt in largely, and on improved demand values advanced. Large shipments were made South and West and the export trade held steady. Receipts of live hogs fully equalled those of last week, and good weight was maintained, the average for March being 211 pounds. against 206 pounds a year ago. The month'y statement of provisions in store disclosed increased stocks, the total being 166,552,905 pounds, against 161,587,065 pounds the previous month and 152 323,699 pounds for March, 1904. Live stock receipts, 304,631 head, compare with 290,994 head last week and 320,300 head a year ago. Choice beeves again brought the best prices this year, and hogs recovered last week's five cent decline. Heavy sheep were unchanged, notwithstanding liberal arrivals. Other receipts compared with a year ago as follows: Flour, 117,979 barrels, against 207,824; wheat, 156,400 bushels, against 148,300; corn, 2,446,100 bushels, against 624,335; oats, 1,309,200 bushels, against 1,229,312; rye, 16,000 bushels, against 59,957; barley, 366,473 bushels, against 305,322; dressed beef, 4,346,171 pounds, against 2,876,405; lard, 524,356 pounds, against 796,332; cheese, 1,130,265 pounds, against 1,127,484; butter, 2,871,088 pounds, against 2,925,774; eggs, 87,853 cases, against 76,068; wool, 372,884 pounds, against 355,907; cattle, 59,820 head, against 52,035; hogs, 151,320 head, against 186,746; sheep, 93,491 head, against 81,519.

THE MINNEAPOLIS FLOUR OUTPUT.

MINNEAPOLIS.—Sales of flour for the week were much less than the output. Trade was very dull and wholly for domestic requirements, practically no foreign sales being made. Mills have been operating on about one-half capacity. Cereals and feed are dull and lower.

THE ST. LOUIS MARKET

St. Louis.-Fluctuations in grain values have been wide this week, yet the decline in wheat, corn and oats was only fractional at the close. July wheat was again the feature, and closed at 83tc.; No. 2 red wheat \$1.11t; May corn 45c., and May oats 28c. Flour transfers were wholly to Cuban buyers. Exporters are figuring on new crop flour for future delivery, and some sales are reported. Prices are 5c. to 10c. per barrel lower. Provisions were fairly Mess pork closed at \$12.30, an advance of 12½c. per barrel. Receipts of grain this week were 1,217,690 bushels, against 1.396.765 bushels last week and 712.690 bushels for the corresponding period last year. Shipments were 1,107,320 bushels, against 1,372,185 bushels for the same week last year. Receipts of flour were 54,920 barrels, shipments 66,780 barrels. Receipts of bran were 27,810 sacks, shipments 24,342 sacks.

LEADING WESTERN CATTLE MARKETS.

CINCINNATI.—Total arrivals of cattle this week amounted to 3,428 head, against 3,747 head last week, and, although no material improvement was quotable in price, the general average for the fair and better qualities of beef cattle of all weights has been strong, and up to the past week or two. Common and medium grades of butcher cattle sold fairly at steady prices. Receipts of hogs amounted to 16,479 head, against 14,766 head the preceding week. The quality was generally good. Prices were easier, and the market was 10 and 15 cents lower than a week ago.

OMAHA.—The cattle market ruled active and strong and prices are from 25 to 35 cents higher. The demand has been strong. The market for hogs was in very good condition and prices averaged about the high point of the season. Supplies were well cleaned up every day. There is a very fair run of sheep, but the demand is liberal and prices firmer for all desirable offerings. On the other hand, there was some weakness in the market for lambs.

Kansas City.—Cattle receipts have fallen off, but there was a better demand and at better prices. Hogs sold higher and packers are all buying sheep, and lambs sold fairly well. Cattle receipts were 25,435 head, hogs 42,442, and sheep 20,274 head.

MARKET FOR COTTON.

Small fluctuations, with little net change, have marked the recent course of cotton. Several factors are in evidence too clearly to be ignored, and these influential elements offset the effect of frequent rumors calculated to produce a definite price movement. Enormous receipts and the certainty that a large supply must be carried over into the next crop year are points which allow no dispute. Other reports or influences are subject to more or less debate or modification. Support from speculators is somewhat spasmodic, and daily statements of exports are not uniform by any means. Local wirehouse stocks have decreased of late, despite the free marketing of the South Attention is being gradually concentrated upon the next crop. Exports are largely surpassing last year's, but the favorable comparison for the week is largely due to the insignificant movement a year ago. Weather conditions are calculated to make the Texas crop later than anticipated, but large arrivals of immigrants are opening up new territory, which tends to give the impression that acreage will not be reduced as much as originally expected. Better wheat crop prospects suggest that there will be less ploughing up of grain and replanting in cotton in Oklahoma than occurred last year.

From the opening of the crop year to March 31, according to statistics compiled by the Financial Chronicle, 10,412,752 bales of cotton came into sight, as conpared with 9,088,651 last year and 9,443,935 bales two years ago. This week port receipts were 227,243 bales, against 41,251 bales a year ago and 95,000 bales in 1903. Takings by northern spinners for the crop year up to March 31 were 1,695,274 bales, compared with 1,949,865 bales last year and 1,818,098 bales two years ago. Last week's exports to Great Britain and the continent were 176,633 bales, against 76,047 bales in the same week of 1904, while for the crop year 6,352,729 bales compare with 5,248,921 bales in the previous season.

THE NEW ORLEANS MARKET.

NEW ORLEANS.—Fluctuations of cotton futures have been confined to narrow limits and trading is only of fair proportions. Closing quotations are practically the same as a week ago. Spots, however, are up one eighth and the market for spot is firm. Receipts of cotton at all ports were 7,991,740 bales, against 6,743,086 bales last year.

THE ST. LOUIS MARKET.

ST. LOUIS.—The demand for spot cotton was fair, while transactions were only moderate. Prices advanced slightly. Middling is quoted at 7\subsections color by Stock in warehouse amounts to 47,487 bales, against 14,478 bales for the corresponding period last year.

IRON AND STEEL.

Encouraging reports still emanate from the iron and steel industry. A very heavy tonnage of business has been taken by the leading producer, and it is stated that orders on the books now surpass any previous high point. While there is some complaint in special lines that much of the advance business was taken last fall at lower quotations than now prevail, there is cause for gratification in the present comparatively stationary position of prices. If inflation is avoided during such a season of activity as is now in progress there is reason to hope for stability and probably continued occupation of full capacity. It is reported that the largest consumer has been in the market for a substantial tonnage of pig iron, and there seems to be no doubt that when figures are available the March furnace output will far eclipse all previous monthly records. Navigation is about to open and the labor difficulty appears to have reached a settlement, so that next week should see the beginning of the largest ore movement on record. In the various leading departments of finished steel shapes it is hard to locate the most active, but there is an enormous demand for structural shapes as the spring building season opens. Merchant pipe, plates, sheets and bars all go in'o consumption freely and the outlook is undeniably bright.

MINOR METALS.

The only event of interest in these metals was the further advance in quotation of tin. This upward movement was entirely in response to the London market, for there was scarcely any domestic interest at the new price. Statistics showed a visible supply on March 31 of 14,592 tons, against 14,911 tons a month previous, and 15,662 tons a year ago. Despite the large movement to the Orient, exports of copper for the first three months of 1905 fell 10,000 tons behind last year. Other metal markets were uneventful.

THE PITTSBURG MARKET.

PITTSBURG.-Labor troubles at an independent sheet and tin plate mill at Wheeling, W. Va., and at a steel hoop mill at Greenville, Pa., had little effect on the market, as the production restricted is not large. The leading interest has announced an increase in wages for a portion of its employés, which partially restores the reduction made in the latter part of 1903. The leading steel interest has purchased about 35,000 tons of pig iron for delivery this month; the Bessemer Pig Iron Association will furnish 25,000 tons, and the balance by independent furnaces. The price is reported at \$15.50, Valley, or \$16.35, Pittsburg. The blast furnaces of the leading interest are running nearly to their limit, but with the heavy demand in finished lines is short of iron, and it is expected that its purchases of outside iron for this quarter will reach 110,000 tons. Other inquiries for pig iron in fair amounts for prompt shipments have failed to find sufficient iron available, and eastern mills have been compelled to import iron. Small sales of Bessemer iron are made, but large users have covered their wants for some time. The furnaces are producing at a record rate, and the coke supply is satisfactory. Sales of foundry iron are in moderate lots, and forge orders do not represent much tonnage, but both lines are strong. For No. 2 foundry iron the furnaces are in a position to insist on \$16, Valley, and sales have been made on a basis of \$1685 to \$17.35, Pittsburg, while forge iron is firm at \$15.85 to \$16, Pittsburg. Raw steel is scarce and mills are selling on short time delivery. A number of mills are entirely out of the market. Bessemer billets are quoted officially at \$21, but that price is merely nominal, as sales made are at \$24.50 to \$25 and sheet bars \$26. The production of plates is at a recordbreaking rate, and a number of mills started rolling at noon Sunday instead of in the evening, but they are much behind in deliveries. Some consumers in need of small lots have offered premiums for prompt delivery, and prices are firm at \$1.50 for plates 61 to 14 inches wide and \$1.60 for wider plates, subject to the usual extras for special sizes. The

sheet market is active, with the galvanized product as the leader. Mills have busin as booked into the third quarter. No. 28 black sheets are quoted at \$2.40 and \$3.45 for galvanized.

THE DULUTH MARKET.

DULUTH.—The first consignment this year of iron ore from the mines has arrived at the docks, and regular ore trains are now being placed in service. Last year, owing to the marine strike, ore trains were not put into commission until very late in the season. The ice field has left the head of the lake, and weather indications are favorable for an early arrival of boats from the lower lakes.

THE CHICAGO MARKET

CHICAGO —Production in both crude and finished forms is the highest in two years. New demands were quiet in rails, but the buying has been steadily gaining since the month opened in pig iron, wire products, plates and structural shapes. Factory needs absorbed large quantities of miscellaneous supplies and a good business was done in pipe and merchant forms. Building construction and vessel work are now being rushed and these provide specifications which require prompt delivery. Car builders have further contracts for completion before the close of the year and axle mak—rs are filled with orders involving operation day and night until January. Heavy foundry work is very active and machinery branches have increased demands.

THE PHILADELPHIA MARKET.

PHILADELPHIA.—In iron and steel buying continues heavy. Prices are maintained on an even basis. Pig iron continues firm and the demand good. There is an increased demand for nearly all kinds of finished material, and orders for plates, bars and sheets are large and mills well sold ahead. Structural work is also improving owing to the opening up of outdoor operations.

THE BOSTON MARKET.

Boston.—The pig iron market is very firm, with an active demand. Sales agents are in receipt of a good many orders and foundry people generally are disposed to buy. Contracts for some round lots are on the market and some have been closed. Iron bars are firm and considerable new business in steel bars has been secured. Specifications on old contracts are coming in freely. Steel plate is quiet, with local buyers well covered. Structural material is quiet, but with prospects of larger business soon. Nails are firm and in good demand.

THE CINCINNATI MARKET.

CINCINNATI.—There has been a fair volume of business in pig iron, and prices remain firm. A few large buyers have made purchases, but the larger movement, as heretofore, must be credited to the small consumers, who have placed orders for deliveries running well into the future.

COAL AND COKE.

Fuel conditions are extremely interesting, and the various markets respond to numerous influences. Production of coke by Connellsville furnaces each week attains a new high-water mark, which results in more liberal offerings and slightly easier terms. The traffic facilities are sufficient to handle this unequalled business without difficulty. A settlement of the bituminous miners' dispute in Central Pennsylvania was readily arranged with little interruption to work, and former wages will be maintained despite the very low prices now quoted. The usual April discount on anthracite coal is now in effect, and the next change will be an advance of ten cents on May 1. Orders are expanding with the new stimulus, but weather conditions have not tended to accelerate consumption.

THE PITTSBURG MARKET.

PITTSBURG.—About 18,000,000 bushels of coal were shipped by river on the recent rise, and empty boats are arriving from the South for the next shipment. There is a scarcity of empty barges in the upper pools, where the

n

of

e

9]

d

е

e

e

1-

d

t

d

mines are running nearly full. The movement on the lakes will probably commence next week and rail mines have started shipments to the lake docks.

The coke market is strong and production large. There is considerable stock coke, but shipments will soon clear the stock on hand. A summary of the Connellsville region shows 21,789 ovens in blast and 954 idle. Production, 263,028 tons, compared with 262,908 last week; shipments, 268,313 tons, against 273,543 tons last week; shipments from the Masontown field, 65,364 tons, against 65,828 tons.

THE PHILADELPHIA MARKET.

PHILADELPHIA—The anthracite coal trade is reasonably active, considering the season, and the anticipated reduction in price of 50 cents a ton went into effect on the 1st. inst. The bituminous market is reasonably active.

THE BOSTON MARKET.

BOSTON.—Business in anthracite is quiet, as large retail buyers are holding off for the lower prices expected. At wholesale there are many orders for April shipment. Bituminous coal is quiet, but it is in better request than a few weeks ago.

MARKETS FOR LEAF TOBACCO.

PHILADELPH: A.—Business in domestic leaf tobacco is somewhat quiet. Inquiries for Su natra are not large and dealers are waiting for new goods. Havana is selling in small lots, prices are somewhat advanced and the new crop is short.

CINCINNATI.—Business in leaf tobacco continues good. The weather has been seasonable, and farmers are taking advantage of it to get their crops in shape for delivery. The offerings during the week amounted to 1,671 hogsheads, of which 137 hogsheads were old and 1,534 hogsheads new, and sales 1,436 hogsheads. The 1,534 hogsheads offered averaged \$8.56 per hundred pounds, as against \$8.74 per hundred pounds the previous week.

LYNCHBURG.—Prices are well up on all grades and offerings good in quality, though a considerable portion was off in color and marketed in very soft order. Recaipts were 842,200 lbs., a decrease compared with the previous week of 262,500 lbs.

In the Danville market sales were again heavy, though offerings were common and in bad order. Common fillers have been in better supply and easy; also medium brights, with good fillers firm. Common wrappers are scarce and stronger in price; good to fine wrappers quite scarce and eagerly sought. Trade is quiet in round lots. Sales for March were 7,578,959 lbs., and for the present season 29,109,870 lbs., the latter very close to the amount marketed during the corresponding seven months of the 1903 crop.

LOUISVILLE.—Quotations remain practically unchanged.

Latest statistics of sales and receipts in the Louisville market are given herewith:

	-Sa	les-	-Receipts-			
	1905.	1904.	1905.	1904.		
Week ending April 1	4,262	3,315	3,499	2,287		
Year to date	49,803	38,097	40,012	31,013		

MARKET FOR RICE.

Locally, the situation remains unchanged, a good assortment of Japan rice meeting with a steady demand, and southern markets are quiet, except for the export movement at the Southwest. Cables tell of dull markets abroad. Dan Talmage's Sons report the Louisiana crop movement as follows: Receipts, 1,781,400 sacks rough, against 1,671,300 sacks last year, while sales of 1,361,033 pockets cleaned compare with 1,352,282 in 1904.

New Orleans.—There is very little trading either in rough or clean rice, the demand being chiefly for export grades. Receipts of rough rice were 1,241,169 sacks, against 1,296,471 last year. Receipts of clean rice were 540,230 pockets, against 372,681 l.st year.

HIDES AND LEATHER.

Large tanners have operated freely in domestic hides during the past week and stocks of branded hides have been closely cleaned up at full prices. The Chicago market is firmer, with Texas selling on the basis of 14½c for heavy, but brands and Colorados at 12½c., and branded cows at 12c. to 12½c. Late salting native steers are firm at 13c., and a good many of January salting have been moved at 13½c. The largest sales have been of butt brands and Colorados and branded cows, and fully 50,000 of these have been sold. Heavy native cows bring 12c., and light cows are held firmly at this figure. A sale of 10,000 February and March New York packer native steers has been effected at 12c., which is an advance of ½c. from previous transactions. Foreign dry hides continue unchanged, and country hides are firm on the basis of 10½c. for buffs.

The leather market continues to improve, and trade in most varieties is quite active. Some large eastern shoe manufacturers have covered their wants on hemlock sole, and it is estimated that their total purchases of this variety have amounted to about 250,000 sides. Western shoe manufacturers have purchased liberally of union cut soles and oak sole, and union backs are selling well. Some tanners have advanced prices ½c. 'o lc. on slaughter hemlock sole, hemlock harness and all varieties of side upper leather. Calfskins are the dullest feature of the upper leather situation, and prices on these are still unsettled. The export trade at present is moderate.

BOOTS AND SHORS.

New England manufacturers continue in receipt of a fair amount of fall contracts, and these are now emanating chiefly from western and southern jobbers, eastern wholesalers having placed their original fall orders about a fort-Duplicate spring contracts for practically imnight ago. mediate delivery are coming in slowly and many of the producers are preparing to close down their plants for a couple of weeks in order to take inventories prior to opening their cutting rooms for the new season's run. What supplementary spring orders have been placed will be cut prior to the fall cutting, and some manufacturers who have proportionately more duplicate spring orders booked than other producers will probably be so much longer delayed in their fall cutting. Prices remain on an unchanged basis and for the present are not a disturbing element in the situation. The local jobbing trade continues very brisk, with the Easter trade under full headway.

THE BOSTON MARKET.

Boston.—There is a strong market for footwear and fair activity. While jobbers are not placing many large orders for fall goods, some sizable contracts are being closed and the volume of business is expanding. More activity is expected at an early date, as much important business cannot be further postponed. Duplicate spring orders are of fair extent for the season. The factories are generally well occupied and shipments, since the first of the year, are in excess of 1904. Leather continues to improve. Receipts of union and hemlock sole are kept sold up close, and sales for future delivery have been fair. Upper leather is in good demand and firm. Hides are in better demand.

THE PHILADELPHIA MARKET.

PHILADELPHIA—Leather prices are firm and show a tendency to advance. The goatskin market continues dull. Shoe jobbers report good sales, orders for future delivery increasing in number and quantity.

THE CHICAGO MARKET

CHICAGO —Receipts of hides were 6,636,876 pounds, against 8,043,903 pounds last week and 2,120,070 pounds a year ago. Cattle receipts were 59,820 head, against 54,720 head last week, and 52,035 head a year ago. The buying of hides continued on a liberal scale. Branded grades were in strong request, and calf skins sold readily. Accumulations at interior points have been reduced, and the killing

here shows only moderate increase. The entire range of values was firm, with an upward tendency for future deliveries. Leather production in this district is close up to the capacity of plants, and tanners are getting a steady flow of orders. Shoe buyers placed satisfactory orders with both producers and jobbers. Factory work has accumulated for fall delivery.

THE STOCK AND BOND MARKETS.

Except for some slight hesitation in the early trading the stock market was decidedly strong during the week, and a number of sharp advances took place. Profit taking caused some recessions at times, but the upward movement was well sustained to the close. Transactions were on an increased scale, and the dealings were widely distributed. The incidents influencing values were of a favorable character, although the proposed increase of \$100,000,000 in the preferred capital stock of the Union Pacific Company was variously construed. The earlier announcement of the opinion of the Supreme Court in the Northern Securities Case was regarded as ending the controversy, and that the plan of distribution of the companies' assets would be carried out following the issuance of the Court's mandate on April 17. London's operations were on a smaller scale than recently and the foreigners traded on both sides of the market, with purchases exceeding sales, particularly late in the week.

Union Pacific was again the leader of the railroad division, and it figured largely in the developments of the week. There was a sharp advance on the shares, following the Northern Securities decision, and almost equally as great a decline on the announcement of the proposed capital increase. Thereafter its movements were very erratic, with alternate periods of weakness and strength, reflecting the varying opinions with regard to the new financing of the company. Standard railroad shares, particularly those which figured in the rumors of deals following a readjustment of the roads in the Northern Securities Company, were strong throughout. Canadian Pacific displayed renewed strength, and on purchases for foreign account advanced to the highest point at which it has ever sold. Louisville & Nashville and Atlantic Coast Line scored good gains on the generally favorable conditions in their territory. New York Central's strength was in response to statements that its reported differences with the New Haven would be satisfactorily adjusted and arrangement made with regard to the New York, Ontairo & Western. All the Junior Vanderbilt shares were in apparently good demand at advancing prices. The local traction shares were easier in tone, with the excep ion of Brooklyn Rapid Transit, which was helped by forecasts of heavy summer earnings.

The industrial list presented many interesting features and in a general way showed more aggressive strength than the railroad shares. This was partly the result of the continued talk of mergers affecting some of the prominent companies, notably the southern iron and steel properties and those concerned in the smelting indus'ry. Tennessee Coal & Iron, Sloss-Sheffield and Republic Iron & Steel all advanced sharply in the early trading, but later suffered slightly from profit taking. American Smelting & Refining, Federal Mining & Smelting and National Lead were in strong demand, which carried their prices up rapidly. United States Steel was heavily purchased, particularly the preferred shares and the latter crossed par later, reaching the highest point on record. The decided strength of the shares was associated with the continued reports of the heavy earnings of the corporation, the large orders booked ahead and the proposed acquisition of a Canadian plant. Colorado Fuel & Iron maintained its recent good tone, but the rights to subscribe to the new stock, which were dealt in for the first time on the Stock Exchange, showed a declining tendency. The locomotive and car constructions companies' shares were in further demand. Amalgamated Copper was more

active than for some time past and was one of the strongest features of the week.

The daily average closing prices for sixty railway, ten industrial, and five city traction and gas stocks are appended:

	Last year.	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
Railway	89.60	114.65	115.06	114.91	115.12	115.38	115.35
Industrial	49.41	79.07	79.84	79.76	80.66	81.13	80.98
Gas and Traction	n 119.92	135.40	135.72	135.35	135.25	135.32	135.30

The following table gives the daily amount of sales of stocks and bonds on the New York Stock Exchange, with the weekly and yearly totals, as compared with 1904 and 1003.

RAILROAD AND MISCELLANEOUS BONDS.

Interest in the railroad and miscellaneous bond market on the Stock Exchange centered to a great degree in the speculative issues, and the dealings were largely confined to that class of securities. As a whole, their tone was strong, although there were periods of profit taking, when prices shaded off slightly. Among the leaders were Wabash debenture Bs, United States Reduction & Refining 6s, Standard Rope & Twine issues, Peoria & Eastern income, Distillers' Securities 5s, Central of Georgia incomes, Brooklyn Rapid Transit 4s and American Tobacco 4s. United States Steel 5s were in good demand and reflected the strength of the preferred shares. Union Pacific convertibles were less active than recently and moved irregularly. On the curb Colorado Industrial Company series A 5s sold at 77½ to 76, and the series B at 78 to 71. United States Leather 53 when issued sold at 97½ to 98.

GOVERNMENT AND STATE BONDS.

The sales of government bonds on the Stock Exchange included among the United States issues, 4s, 1907, coupon, at 105½ to 105. 2s, coupon, at 104½, and 3s, registered, at 104½, and among the foreign issues Japanese 6s at 103 to 100, ex-interest; second series at 100½ to 97½, ex-interest; Republic of Cuba 5s at 105 to 105½, and United States of Mexico 4s at 95½ to 96. In the outside market the new Japanese 4½s sold at 89½ to 90½.

The following were the closing bids for Government bonds:

OUTSIDE SECURITIES.

Northern Securities was the feature of the outside security market, and it ranged in price from 161½ to 163½, closing yesterday at 162½. Interborough Rapid Transit sold from 207½ to 213, and closed yesterday at 209½. American Can common sold at 10½ to 12½, and the preferred at 66½ to 72½; Bethlehem Steel sold at 33 to 35, and the preferred at 85 to 85½; Central Foundries sold at 4 to 4½, and the preferred at 23½ to 26½; Chicago Subway sold at 54½ to 55½, Colorado Fuel, new, at 52½ to 55; International Mercantile Marine preferred at 35 to 35½; Mackay Companies at 39½ to 40½ for the common, and 74 to 74½ for the preferred; Standard Oil at 620 to 630; United States Leather, when issued, at 46½ to 47 for the common, and 100 to 102 for the preferred. Granby Copper sold at 6½ to 6, and Green Copper at 28½ to 30.

DRY GOODS AND WOOLENS.

Market conditions have undergone little change in the week, with the exception of increased strength on the part of the seller. Buyers still exhibit little anxiety over the scarcity which exists in many lines, and yet admit they are unable to secure many things of which they stand in need. In a good many instances premiums are being paid for prompt delivery, and the buyer is not questioning the price provided he can be satisfied on the matter of shipment. The scarcity which exists has led to certain peculiar conditions, not the least of which is the admitted fact that practically as much is being paid for seconds and short lengths as for first quality goods. Export business at full prices has been reported during the week, and while not of large proportions, it has extended the period to which a good many mills are sold, making the attitude of agents all the more independent. Advices from jobbing centers throughout the country indicate a material improvement and, although buying continues very conservative, it is evident stocks are being depleted much more rapidly than earlier. With the local jobber trade is of declining proportions, but the nearby buyer has still a great many goods to buy. There is little possibility of improvement in the men's wear division until the clothier's trade warrants the placing of duplicates. Dress goods developments are proceeding satisfactorily, with first orders practically completed from jobbers, and with the manufacturing trade showing interest for fall.

COTTON GOODS

Further demand has been received for export during the week, and although the aggregate orders do not stand comparison with the activity during the recent China movement, they have indicated willingness on the part of export buyers to pay full prices and to accept late delivery. Orders referred to have been received from Red Sea ports on 3.25 and 3.50 sheetings at 64 and 64 cents, respectively. These mark the highest level which has been paid on export goods for a long time, and, as the deliveries extended into March of next year, it is evident the export buyer at least has faith in the situation. China has been practically out of the market, although inquiries would seem to indicate that if satisfactory deliveries could have been secured more or less would have been purchased. On 4-yard 48x52 sheetings slight sales have been made at favorable prices, but on the finer counts little interest has been shown. Demand from the home trade for coarse yarn goods is very conservative, although purchases of lighter weights up to 6-yard sheetings have been of fair average extent. On 4-yard sheetings goods are available for fairly reasonable delivery and the advance on these has not been as radical as on heavier lines. On gray goods of print cloth yarn construction the market retains its firmness. On wide goods slight appreciations have been reported in one or two directions, but the market is practically on an unchanged level. Narrow goods are being taken moderately by printers at old prices, and Fall River manufacturers continue to take contracts with more or less reluctance, due to the labor uncertainty. Southern mills are not credited with being in as good shape on wide goods as a month or two ago, but no weakness has developed in this direction. Bleached goods are being taken conservatively but at old prices. Prints are still slow, although slight improvement is noted with the South and export demand is a very helpful factor. Staple ginghams are one of the most indifferent articles in the list, with sales possible only at material sacrifice. Dress ginghams are generally firm.

The following is an approximate range of quotations: Brown sheetings, standard eastern, 6½c. to 7c.; southern, 6½c. to 6½c.; 3 yards, 6½c. to 6½c ; 4 yards, 4½c. to 5c.; drills, standard, 6½c. to 7c. Bleached muslin, standard, 4-4, 4½c. to 4½c.; kid-finished cambrics, 3½c. to 3½c.

MEN'S WEAR AND DRESS GOODS.

The clothier has as yet comparatively little idea of the trend of demand among his customers for the coming fall

season, and naturally he is not a very active operator in the men's wear market as a consequence. A few duplicates are being received, but they are desultory in character and do not indicate the possibilities of the return order business. Men's wear manufacturers are at present busily engaged in getting out their sample prices. Dress goods for fall are in a very favorable condition, as far as the majority of lines are concerned. Little development has taken place, but the tendency before outlined toward plain fabrics is being borne out in actual experience. Broadcloths stand preeminent among the favorites for the fall season, and with an increasing demand for cashmeres and henriettas, both domestic and foreign, the status of this class of goods is increasingly favorable.

THE YARN MARKET

Cotton yarns are held even more firmly and with spinners sold up to a considerable distance in many instances, it is only natural that spinners should be reluctant to accede to importunities of the buye. A good many of the latter are short of supplies and are having a good deal of difficulty in securing deliveries. Advinces of at least 1 cent on the lower numbers are not infrequent.

THE MARKET FOR WOOL.

One hundred grades of domestic wool in the Philadelphia market averaged 25.43 cents on April 1, according to the monthly circular of Coates Brothers, a slight decline for the month, but an advance of 3½ cents as compared with the level existing a year ago. Trading is seasonably light, but this is largely due to the small offerings, and the new clip promises to find a ready sale as it comes forward. Foreign wool is available, but attracts little attention except where necessities are urgent.

THE BOSTON MARKET.

Boston.—There is fairly active trading in wool and sales of domestic and foreign are at full previous prices. Bullish mail advices are received from abroad, and in the West primary markets are excited and high prices prevail everywhere. A well known Montana clip sold at $5\frac{1}{2}$ cents above last year. Receipts were 2,880,544 pounds and deliveres 6,010,171 pounds.

THE PHILADELPHIA MARKET.

PHILADELPHIA.—There has been but little business transacted in the Philadelphia wool market this week. Manufacturers have been in the market sampling, but stocks of domestic wool are largely depleted, and manufacturers have but a small assortment from which to select. Consequently orders are infrequent and small in amount.

Foreign Trade at Leading Ports.

A sharp recovery occurred in shipments of merchandise from the port of New York during the last week, and an abnormally heavy gain is recorded over the corresponding period of 1904, although the movement at that time was far below normal. Imports were in more moderate volume, but exceeded last year's aggregate by a substantial margin. Comparing total exports and receipts for the year thus far with those of 1904, increases of \$6,720,693 and \$31,790,895, respectively, are discernible. Returns from Boston indicate a continued falling off in the outgo of merchandise, but imports, on the other hand, were again largely in excess of the figures for a year ago. Little net change is noticeable in shipments at Philadelphia, while receipts show a moderate loss. Satisfactory reports are received from Baltimore, exports for the last week showing a moderate gain over last year, while imports also increased, although the movement a year ago was insignificant.

The following table gives the exports and imports at the leading Atlantic ports for the last week and for the year thus far, together with the corresponding movements in 1904:

		eek	Fourteen	Weeks

Of the \$100,000,000 First Lien Convertible Bonds originally issued by your Company \$54,255,000 have been converted up to date into common stock, and it is assumed that the remainder will likewise be converted before May, 1906, Fixed charges have thereby been greatly diminished and the equity behind the preferred stock correspondingly increased, and with the remainder will likewise be converted before May, 1906, Fixed charges have thereby been greatly diminished and the equity behind the preferred stock is and for sime months has been about par. This situation enables the company to pursue the wise and conservative policy which requires that a corporation whenever possible should finance at least a part of its capital requirements—especially such as arise in connection with the acquisition of stocks of other companies—through the issue of stock rather than through the creation of fixed interest bearing obligations. The advantages of such a policy are obligations. The advantages of such a policy are obligations. The advantages of such a policy are obligations, and will enure to the benefit of the holders of both common and prefer the stock in that the acquisition and prefer the stock in that the advantage of such as the company further advantages ahead of the stock may be avoided and the credit and position of the Company further advanced. Your company, moreover, will be placed in a position admitting in due time of a more liberal attitude towards the distribution of its surplus income.

As the common share capital has been and will be further added to by the conversion of the convertible bonds, your Directors are of the optimion that the common stock should not in the near future be still further increased; they do, however, consisting proportion between the common and preferred stock.

Your Directors, therefore, recommend the creation of an additional issue of preferred stock, at present outstanding, and to that end have called a special nevery respect to the p
